

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

dity he found Two Years ago; *viz.* One Hundred and Fifty Pound Weight dashed on the Shoar at a Place in these Parts called *Ambergriese Point*, where the *Spaniards* usually come once a Year to look for it. This vast Quantity was divided in Two Parts; supposed by rolling and tumbling in the Sea; but that which I have to inform you, is the Way how 'tis produced; *viz.* from a Creature, as Honey or Silk; for I saw in sundry Places of this Body, the Beaks, Wings, and part of the Body of the Creature which I preserved some time by me, and this ignorant Fellow (for so you would term him if you knew all) has seen the Creature alive; and he adds, That he believes they swarm as Bees, on the Sea-Shore or in the Sea. This account is very different from what I ever met with, so I thought fit to Communicate it. We have lately discover'd Two hot Springs. One to Windward, which seems Sulphurous: The other to Leeward is very Salt; but as I am told does not partake of Brimstone, and both very much magnify'd for the Endemick Diseases of these Parts, the dry Belly-ach, Pains of the Nerves, and Yaws.
